## PROFILE

Senior full-stack engineer and technical leader with 12+ years of production experience across startups, enterprise (PwC), and high-growth products. Former CTO. I've built and scaled mobile applications, web platforms, and cloud infrastructure from scratch to production.

Now I build exclusively for the consciousness, wellness, and personal growth space — the world I've been immersed in for years as a certified practitioner and facilitator. I bring the technical depth of enterprise engineering and the human understanding of someone who lives this work from the inside.

I'm looking for engineering and product roles at companies building for this space — or to continue building custom platforms for teachers, healers, and practitioner organizations through my studio, Astral Integration.

---

## CORE STACK

React · React Native · TypeScript · Node.js · C# ASP.NET · GraphQL · REST APIs · PostgreSQL · MongoDB · AWS · Docker · Kubernetes · CircleCI · Supabase · Next.js · Expo · tRPC

**Also:** Redux, Styled Components, Material-UI, Tamagui, Solito, Jest, Cypress, Detox, RabbitMQ, EventSourcing, CQRS, DDD, TDD, SOLID, Agile/Scrum, GV Design Sprint, Smart Contracts (Solana, Ethereum)

---

## EXPERIENCE

### Founder & Lead Engineer — Astral Integration

2024 — Present · Mazunte, MX · Remote

- Building custom digital platforms for consciousness teachers, healers, and practitioner organizations worldwide.
- Course platforms, booking systems, member portals, practitioner directories, community tools, AI-powered assistants, and full digital operations.
- End-to-end ownership: product strategy, architecture, UI/UX, development, deployment, and ongoing support.
- Revenue share partnership model alongside fixed-price projects — aligned incentives, long-term relationships.

**Stack:** React, React Native, TypeScript, Node.js, Next.js, Supabase, PostgreSQL, AWS, Expo, Stripe

### Product Lead & Senior Full-Stack Engineer — Hostology (Contract)

Sep 2023 — Apr 2025 · London, UK · Remote

- Worked closely with the CTO as the senior technical counterpart, spanning product, architecture, and delivery.
- Designed and built the frontend architecture (React + GraphQL) for a production SaaS event management platform.
- Migrated core infrastructure to AWS, significantly improving uptime, scalability, and operational reliability.
- Implemented CI/CD pipelines (CircleCI), reducing deployment time and release friction.
- Co-led product development, translating roadmap and UX decisions into shipped features with strong test coverage.

**Stack:** React, TypeScript, Node.js, GraphQL, C# ASP.NET, CircleCI, AWS

## Practitioner, Facilitator & Independent Developer — Independent

2020 — 2023 · Global

- Three-year immersion in the consciousness and healing space. Trained and certified across multiple modalities (500+ hours): ThetaHealing, Access Consciousness, Kundalini Yoga, Family Constellations, Reiki, therapeutic counselling.
- Coached international clients and facilitated groups across multiple countries.
- Maintained hands-on technical practice building wellness applications in the React Native ecosystem.

*This period is the foundation of everything I build now — deep first-hand understanding of what practitioners, teachers, and healing organizations actually need from their technology.*

## CTO & Sole Engineer — Tinto (Contract)

Feb 2020 — Jul 2020 · London, UK · Remote

- Acted as founding CTO and sole engineer for an early-stage wellness app supporting women in motherhood.
- Built a React Native mobile application from scratch; designed and deployed the full backend and cloud infrastructure on AWS.
- Delivered a production-ready MVP in under three months.
- Mentored junior AI engineers; collaborated with CEO on product planning and feature roadmap.

**Stack:** React Native, TypeScript, Redux, Detox, Jest, Node.js, Docker, AWS

## Senior Frontend Engineer — Just Insurance (Contract)

Apr 2019 — Aug 2019 · London, UK · Hybrid

- Built React Native mobile apps for pay-per-mile car insurance across iOS and Android.
- Developed real-time vehicle tracking systems with GPS data processing and crash analytics.
- Implemented CI/CD pipeline using CircleCI, fastlane, and Crashlytics; managed app store releases.
- Led codebase migration and integration of Auth0, Sentry, and Firebase.

**Stack:** React Native, TypeScript, Redux, Firebase, PostgreSQL, Heroku, CircleCI

## Frontend Lead & Full-Stack Engineer — Movebubble (Full-Time)

Apr 2016 — Nov 2018 · London, UK · Hybrid

- Progressed from full-stack developer to technical leadership role in a high-growth property startup.
- Led development of Negotiator App (React Native) from prototype to core product — now a vital part of the business.
- Built and maintained Renter app (React) and backend systems for the property rental platform.
- Implemented rapid deployment pipeline, reducing release time to minutes.
- Mentored junior developers in full-stack technologies; collaborated in GV Design Sprints.

**Stack:** React Native, React, Node.js, TypeScript, GraphQL, C# ASP.NET, MongoDB, Cypress, Jest

## Backend Engineer — PwC (PricewaterhouseCoopers) (Full-Time)

Dec 2014 — Apr 2016 · London, UK · On-site

- Designed and built C# ASP.NET Web APIs for enterprise tax application systems.
- Implemented ESB/SOA architecture with EventSourcing and RabbitMQ, optimising file processing performance.
- Built employee tracking application using AngularJS, Web API, Entity Framework, and SQL Server.
- Established CI pipeline with quality gates and automated deployments via Octopus Deploy.

**Stack:** C# ASP.NET, JavaScript, PL/SQL, SQL Server, MongoDB, EventSourcing, RabbitMQ, TeamCity

## Backend Engineer — MRW (Full-Time)

Jan 2013 — Nov 2014 · Barcelona, Spain · On-site

- Implemented SOA with EventSourcing and CQRS patterns for package delivery management at scale.
- Integrated 40+ autonomous components into a modular, scalable logistics application.
- Applied Domain-Driven Design and Test-Driven Development under senior architecture mentorship.

**Stack:** C# ASP.NET MVC, MongoDB, SQL Server, EventSourcing, CQRS, RabbitMQ, DDD, TDD

---

## CERTIFICATIONS & TRAINING

### Healing & Holistic Therapy

ThetaHealing Practitioner & Instructor · Access Consciousness Practitioner · Family Constellations Facilitator · Sacred Earth Medicine Facilitator · Reiki Teacher · Therapeutic Counselling

### Yoga & Embodiment

200hr Kundalini Yoga · 60hr Mind & Meditation Yoga · 200hr Ashtanga Vinyasa Yoga · 100hr Yin Yoga · Laughter & Children Yoga

---

## EDUCATION

### Bachelor's Degree in Computer Software Engineering

UPC — Polytechnic University of Catalonia, Barcelona School of Informatics (FIB) · 2009–2013

Final thesis: Location-aware event platform with real-time geotagged social content, dynamic geospatial UI, and live map-based discovery.

## WHAT PEOPLE SAY

*“Jordi is an excellent developer and dedicated team member; hard-working and committed with an incredible capacity for learning new skills and technologies. In a very short time he took the Movebubble Agent App from a prototype to a fully functioning, cross-platform mobile app — now a vital part of the business. I can't recommend Jordi highly enough.”*

— **Tom Allen**, Technical Lead at NEVERBLAND (formerly Movebubble)

*“His energy and enthusiasm for not only the brand, his colleagues but also the end users is what makes Jordi stand out. His close eye to detail and willingness to give and receive constructive feedback made him the perfect developer to work with. A true character and colleague!”*

— **Sunil Pithwa**, Lead UX Consultant (formerly Movebubble)
